

# Key fobs with chip

Key fobs with chip are easy for your guests to carry in their pocket, on a key ring, or in a wallet.

Each fob is supplied with its own unique ID.

## Simple operation

Operation is straightforward: the fob is held in front of the CompuMat reader for identification.

Light and sound indicate approval and activation.

Easy and intuitive – no buttons or display.

## Multifunctional

The key fobs can be used for access control and as a payment medium.

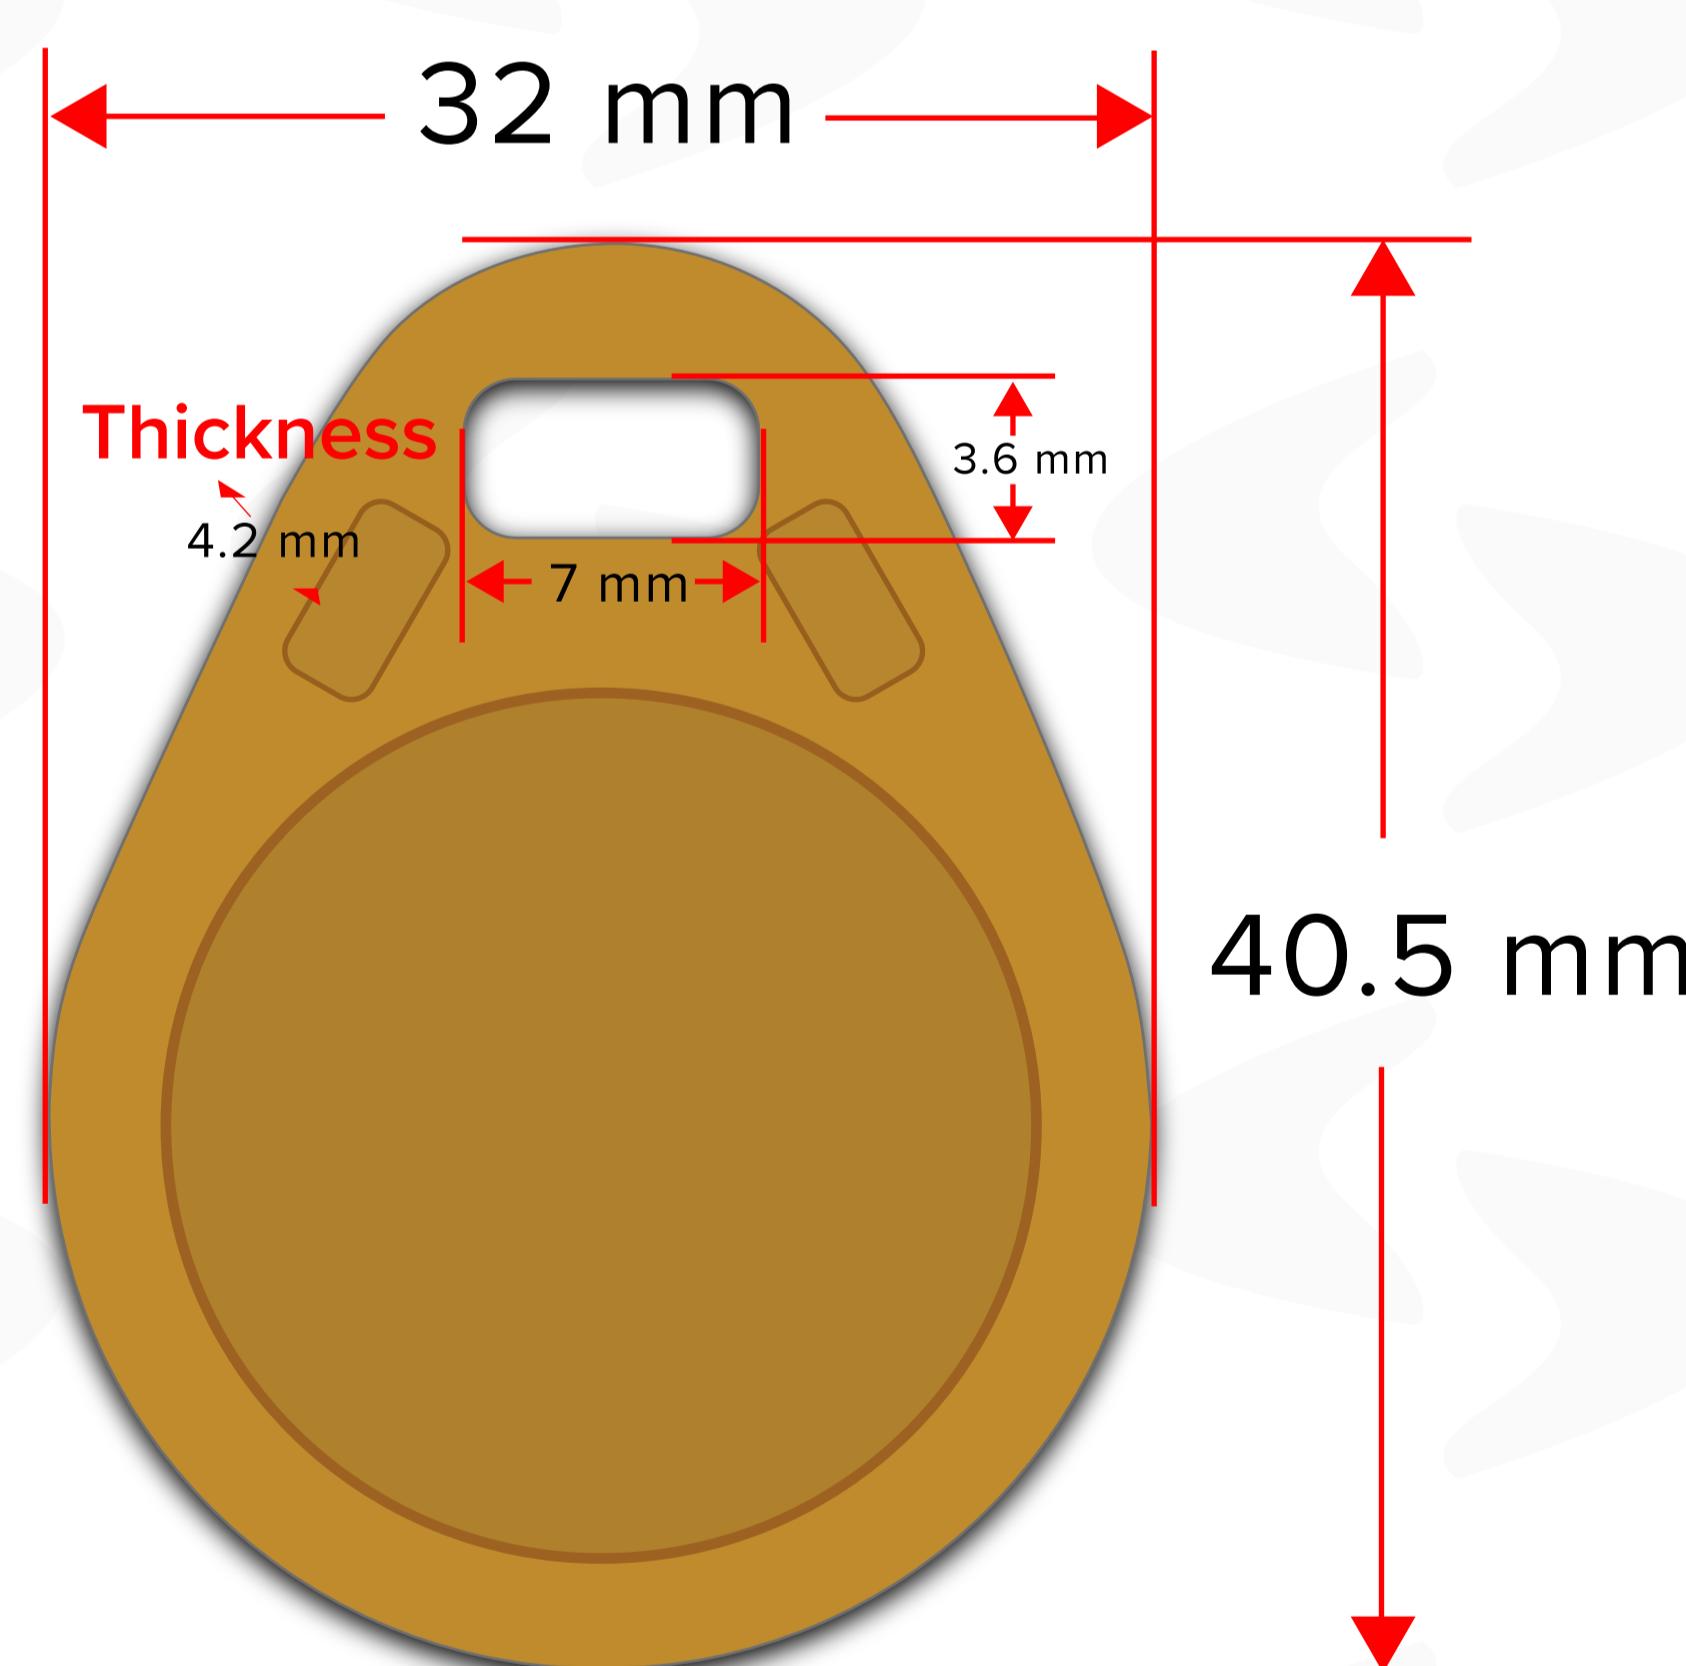

They can be set up as a multi-account, allowing guests to use multiple fobs linked to the same account.

## Reusable

Data from guests' key fobs can be read in real time via the system.

The fobs can then be reset and reused for new guests.

## Dimensions

## Specifications
