COMPUSOFT

Ticket printer

Ticket printer for fast and easy issuance of wristband tickets.

With automatic loading and a print speed of 200 mm/sec, there is no waiting time.

Simple operation

The ticket printer is connected via Ethernet and integrated with our web server for fast and easy operation.
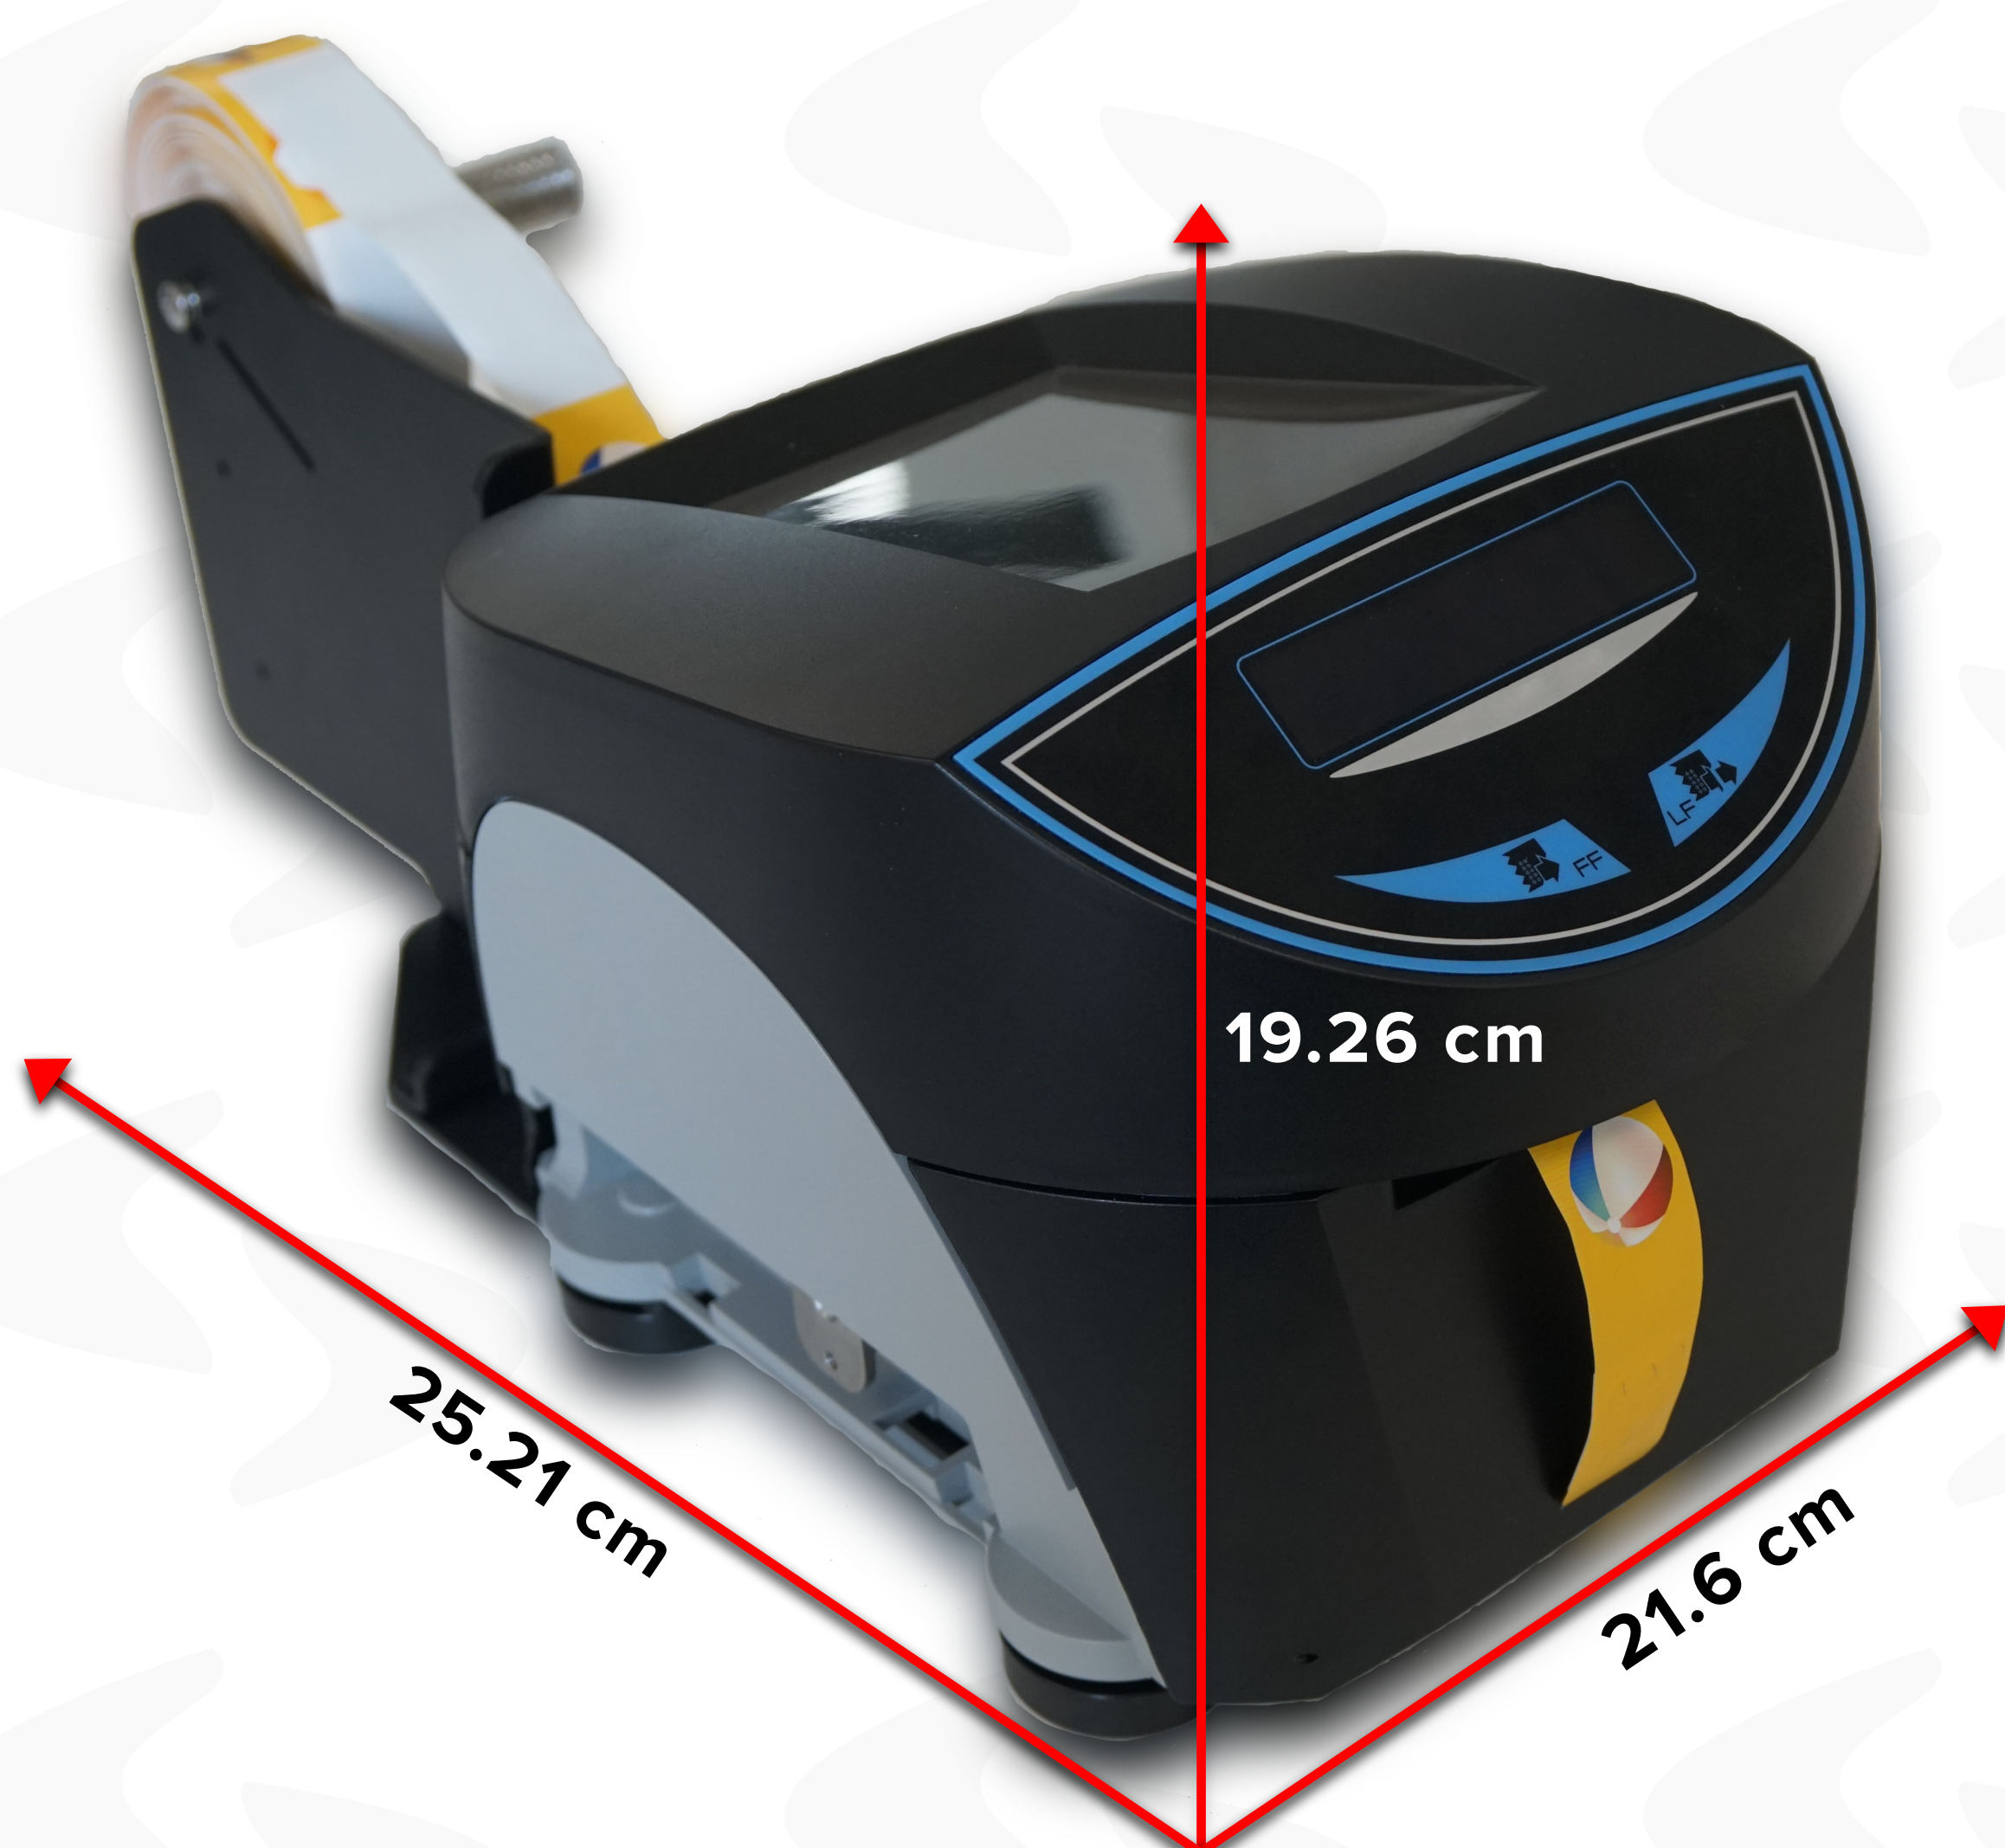

Create your own wristbands

The printer supports rolls with up to 200 wristbands per roll.

Design your own wristbands and enable printing of names, QR codes, and more directly on the wristband.

Self-service purchase of tickets and stays

Guests can purchase tickets or book stays online or via the CompuSoft self-service terminal.

Self-service check-in

Upon arrival, a QR code is scanned and the printer issues the ticket, which is then registered in the CompuSoft access control system.

Dimensions

252.1 (L) x 192.6 (H) x 216 (B) mm

19.26 cm

25.21 cm

21.6 cm

Print formats

The ticket printer can print various widths from 20 to 82.5 mm and thicknesses from 80 to 255 g/m^2.

In addition, ticket lengths are measured automatically.

The ticket printer supports printing on various media, such as wristbands on rolls or folded sheets in different formats.

When printing tickets, the chip inside the wristband is scanned, ensuring that the wristband is registered as the guest's ID.
