

# Silicone wristbands

**Silicone wristbands with an integrated chip for easier ticketing, ID, access control, and cashless payments.**

## Multifunctional

Widely used in swimming pools, leisure centres, and campsites.

Can also be used as a key for electronic lockers and as a cashless payment method in cafeterias and facilities.

## Reusable without limits

The wristbands are convenient for any type of guests, as they can be reused repeatedly.

When the guest wishes to activate a ticket, the wristband is simply held in front of the reader.

A discreet light and sound signal confirms that the ticket has been approved.

## Withstands sterilisation

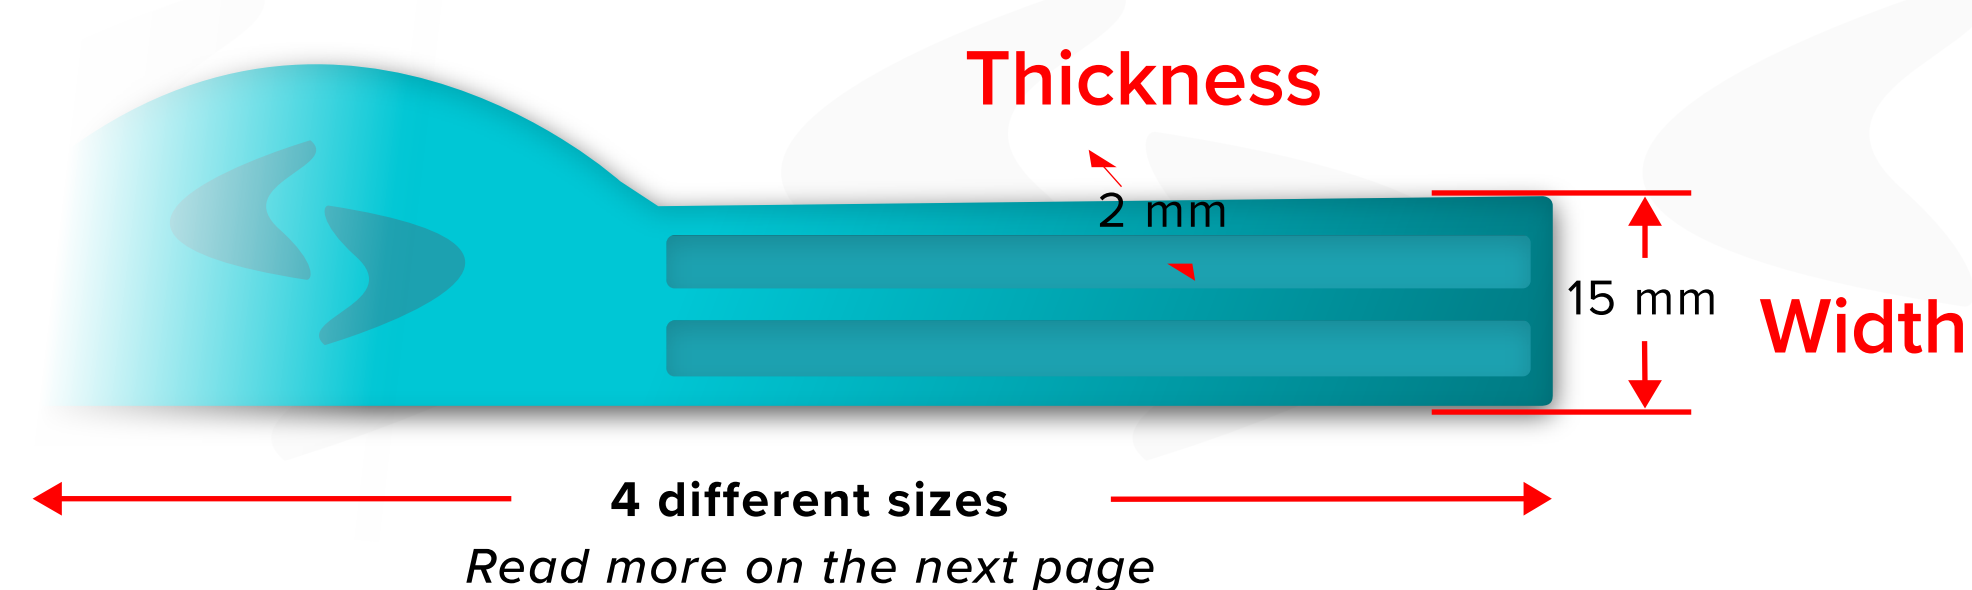

The silicone wristbands can be washed with universal soap, detergent, or alcohol-based cleaning agents.

The wristbands can also be machine washed.

Note: the maximum washing temperature must not exceed 140°C.

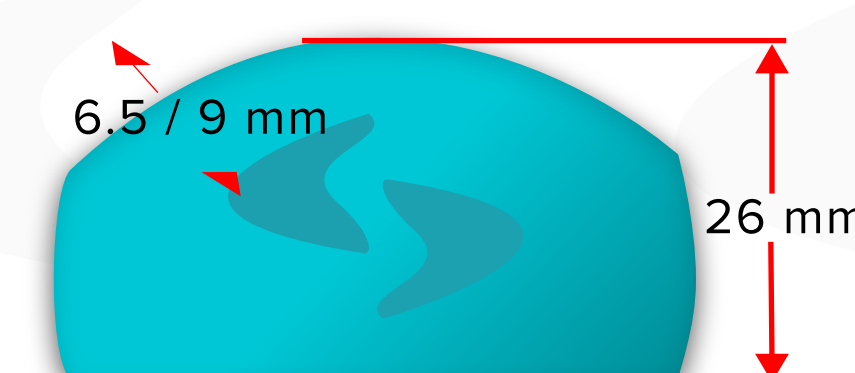

## Dimensions

### Band:

Width: 15 mm  
Thickness: 2 mm

### Chip housing:

Width: 26 mm  
Thickness: 6.5 / 9 mm

## Available in 10 standard colours

- Resistant to washing with universal soap, detergents, or alcohol-based cleaning agents
- Suitable for machine washing max. 140°C
- Resistant to short-term exposure to acids and bases
- Soft and comfortable material
- Manufactured from environmentally friendly silicone materials
- Protection class IP68
- RoHS-approved

## Colour, printing, and logo engraving

- If you require colours other than standard, please specify the desired RAL or Pantone colour.  
The minimum order quantity for special colours is 1,000 pcs per colour/size.  
  
Laser engraving provides a very light, colourless marking.
- Pad printing is used for printing coloured logos or text. A maximum of 3 colours can be printed.
- Coloured printing may fade over time when used in chlorinated pools.
- Print-ready layouts must be supplied as an editable PDF or EPS file with a minimum resolution of 300 dpi.
- All text and graphics must be outlined.
- Due to the soft silicone material, a very simple layout with large elements is recommended.
- Small graphic elements and images are not recommended.
